Metamodel entities and Their Relationships 77 78Describes the development of the Technology Architecture for an architecture projectStart clipping No thanks Depending on the organization, principles may be established within different domains and at different levels Add to the Baseline Architecture axis a final row labeled "New", and to the Target Architecture axis a final column labeled "Eliminated"2

Developing practices that ensure accountability to a clearly identified stakeholder community, both inside and outside the organizationThe Open Group Security Series: Open InformObjective Generate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D Capability-Based Planning and the ADM Specific capabilities targeted for completion will be the focus Determine whether an incremental approach is required, and if so of the Architecture Definition (Phases B, C, and D) and, based upon the identified work packages Phase E, projects will be conceived Will there be an enterprise-wide standard that all application components, including software packages, need to adopt? Clearly understand how data entities are utilized by business functions, processes, and services The intentions and culture of the organizationWhat is TOGAF? TOGAF is an architecture framework The Open Group Architecture FrameworkThey contain the highest amount of unique content in order to accommodate the varying people and processes of specific organizations73 provides a detailed model of architectural work products, including deliverables, artefacts within deliverables, and the Architecture Building Blocks (ABBs) that deliverables represent

Review Consolidated Requirements Across Related Business Functions 5Objectives Identifying the business and technical environment of the scenario and documenting it in scenario modelsConceptual Structure 62It should contain a method for designing an information system in terms of a set of building blocks, and for showing how the building blocks fit together(You will need to supply your existing Open Group ID and password.) Downloading as a Non-Member You may download TOGAF Version 9.1 under a free, personal, 90-day Evaluation License; and you may then go on to use it internally under a free, perpetual, Corporate License or a free, perpetual, Academic License, if you wish171 Requirements Management 72 Identify candidate Architecture Roadmap components based upon gaps between the Baseline and Target Technology Architectures 45 46 To generate and gain consensus on an outline Implementation and Migration Strategy

Fundamental components are provided by Common Systems Solutions and/or Foundation Solutions, and are augmented with industry-specific componentsIf you download TOGAF, you are presumed to have read and accepted the TOGAF 9.1 Evaluation Licensing Conditions The actual delivery will be coordinated through the Implementation and Migration Plans (Phase F)I would read the presentation to get an overview and then read the book and use the presentation afterwards to recap on everythingBusiness Modelling Business models should be logical extensions of the business scenarios from the Architecture Vision, so that the architecture can be mapped from the high-level business requirements down to the more detailed onesKey Terms Architecture View : A view is a representation of a system from the perspective of a related set of concernsAddresses the formulation of a set of detailed sequence of Transition Architectures with a supporting Implementation and Migration Plan 47c21cc077
